

subtracted from the landings quota in the following fishing year or from the reserve category. NMFS will file with the Office of the Federal Register for publication notification of any adjustment made under this paragraph (c)(3)(iii).

[64 FR 29135, May 28, 1999, as amended at 64 FR 58796, Nov. 1, 1999; 65 FR 42887, July 12, 2000; 65 FR 77526, Dec. 12, 2000; 66 FR 8904, Feb. 5, 2001; 66 FR 42805, Aug. 15, 2001; 66 FR 67121, Dec. 28, 2001; 67 FR 70026, Nov. 20, 2002; 67 FR 77438, Dec. 18, 2002; 68 FR 32417, May 30, 2003; 68 FR 56788, Oct. 2, 2003; 68 FR 74511, 74785, Dec. 24, 2003; 69 FR 40758, July 6, 2004; 69 FR 68093, Nov. 23, 2004; 69 FR 69544, Nov. 30, 2004; 71 FR 29089, May 19, 2006]

**§ 635.28 Closures.**

(a) *BFT*. (1) When a BFT quota, other than the Purse Seine category quota specified in § 635.27(a)(4), is reached, or is projected to be reached, NMFS will file with the Office of the Federal Register for publication notification of closure. On and after the effective date and time of such notification, for the remainder of the fishing year or for a specified period as indicated in the notice, fishing for, retaining, possessing, or landing BFT under that quota is prohibited until the opening of the subsequent quota period or until such date as specified in the notice.

(2) From the commencement date of the directed BFT purse seine fishery, as provided under § 635.27(a)(4)(i), through December 31, the owner or operator of a vessel that has been allocated a portion of the Purse Seine category quota under § 635.27(a)(4) may fish for BFT. Such vessel may be used to fish for yellowfin, bigeye, albacore, or skipjack tuna at any time, however, landings of BFT taken incidental to fisheries targeting other Atlantic tunas or in any fishery in which BFT might be caught will be deducted from the individual vessel's quota for the following BFT fishing season. Upon reaching its individual vessel allocation of BFT, the vessel may not participate in a directed purse seine fishery for Atlantic tunas or in any fishery in which BFT might be caught for the remainder of the fishing year.

(3) If NMFS determines that variations in seasonal distribution, abundance, or migration patterns of BFT, or the catch rate in one area, precludes

anglers in another area from a reasonable opportunity to harvest a portion of the Angling category quota, NMFS may close all or part of the fishery under that category and may reopen it at a later date if NMFS determines that BFT have migrated into the other area. In determining the need for any such interim closure or area closure, NMFS will consider:

(i) The usefulness of information obtained from catches of a particular geographic area of the fishery for biological sampling and for monitoring the status of the stock;

(ii) The current year catches from the particular geographic area relative to the catches recorded for that area during the preceding 4 years;

(iii) The catches from the particular geographic area to date relative to the entire category and the likelihood of closure of that entire category of the fishery if no interim closure or area closure is effected; and

(iv) The projected ability of the entire category to harvest the remaining amount of BFT before the anticipated end of the fishing season.

(b) *Sharks*. (1) The commercial fishery for large coastal sharks will remain open in each region under the fishing seasons and regional quotas, as specified at § 635.27(b)(1). From the effective date and time of a season closure in a particular region until additional quota becomes available, the fishery for large coastal sharks in that particular region is closed.

(2) When the fishing season quota for small coastal sharks or pelagic sharks specified in § 635.27(b)(1) is reached for a particular region, or is projected to be reached, NMFS will file for publication with the Office of the Federal Register, a notice of closure at least 14 days before the effective date. From the effective date and time of the closure until additional quota becomes available, the fishery for the appropriate shark species group in that particular region is closed.

(3) When the fishery for a shark species group in a particular region is closed, a fishing vessel, issued an Atlantic Shark LAP pursuant to § 635.4, may not possess or sell a shark of that species group in that region, except under the conditions specified in

§ 635.22 (a) and (c), and a shark dealer in that region, issued a permit pursuant to § 635.4, may not purchase or receive a shark of that species group from a vessel issued an Atlantic Shark LAP, except that a permitted shark dealer or processor may possess sharks that were harvested, off-loaded, and sold, traded, or bartered, prior to the effective date of the regional closure and were held in storage. Under a regional closure for a shark species group, a shark dealer issued a permit pursuant to § 635.4 may, in accordance with state regulations, purchase or receive a shark of that species group if the sharks were harvested, off-loaded, and sold, traded, or bartered from a vessel that fishes only in state waters and that has not been issued a Shark LAP, HMS Angling permit, or HMS Charter/Headboat permit pursuant to § 635.4.

(c) *Swordfish*—(1) *Directed fishery closure*. When the annual or semiannual directed fishery quota specified in § 635.27(c)(1)(i) or (ii) is reached, or is projected to be reached, NMFS will file with the Office of the Federal Register for publication notification of closure at least 14 days before the effective date. From the effective date and time of the closure until additional directed fishery quota becomes available, the directed fishery for the appropriate stock is closed and the following catch limits apply:

(i) When the directed fishery for the North Atlantic swordfish stock is closed,

(A) No more than 15 swordfish per trip may be possessed in or from the Atlantic Ocean north of 5° N. lat. or landed in an Atlantic coastal state on a vessel using or having on board a pelagic longline. However, North Atlantic swordfish legally taken prior to the effective date of the closure may be possessed in the Atlantic Ocean north of 5° N. lat. or landed in an Atlantic coastal state on a vessel with a pelagic longline on board, provided the harvesting vessel does no fishing after the closure in the Atlantic Ocean north of 5° N. lat., and reports positions with a vessel monitoring system, as specified in § 635.69. Additionally, legally taken swordfish from the South Atlantic swordfish stock may be possessed or landed north of 5° N. lat. provided the

harvesting vessel does no fishing on that trip north of 5° N. lat., and reports positions with a vessel monitoring system as specified in § 635.69. NMFS may adjust the incidental catch retention limit by filing with the Office of the Federal Register for publication notification of the change at least 14 days before the effective date. Changes in the incidental catch limits will be based upon the length of the directed fishery closure and the estimated rate of catch by vessels fishing under the incidental catch quota.

(B) No more than 2 swordfish per trip may be possessed in or from the Atlantic Ocean north of 5° N. lat. or landed in an Atlantic coastal state on a vessel that has been issued a handgear permit under § 635.4(f)(1) provided that such swordfish were not taken with a harpoon.

(ii) When the directed fishery for the South Atlantic swordfish stock is closed, swordfish from that stock taken incidental to fishing for other species may not be retained.

(2) *Incidental catch closure*. When the annual incidental catch quota specified in § 635.27(c)(1)(i) is reached, or is projected to be reached, NMFS will file with the Office of the Federal Register for publication notification of closure. From the effective date and time of such notification until an additional incidental catch quota becomes available, no swordfish may be possessed in or from the Atlantic Ocean north of 5° N. lat. or landed in an Atlantic coastal state, and a swordfish in or from the Atlantic Ocean north of 5° N. lat. may not be sold. However, legally taken swordfish from the South Atlantic swordfish stock may be possessed in the Atlantic Ocean north of 5° N. lat. or landed in an Atlantic coastal state on a vessel with a longline, provided the harvesting vessel does not fish on that trip in the Atlantic Ocean north of 5° N. lat. and reports positions with a vessel monitoring system, as specified in § 635.69.
